

Loss of Appetite with Cancer Treatment

Loss of appetite is one of the most common problems with cancer treatment. Eating healthy meals and drinking liquids will help you feel better during treatment.

Follow these tips to improve your appetite:

- Eat small meals more often during the day.
- Drink liquids if you do not feel like eating solid food. Try juice, soup, milkshakes, and liquid or powdered meal supplements such as “Instant Breakfast”.
- Keep snacks with you and eat whenever you feel like it.
- Drink liquids between meals so that you are not too full to eat at mealtime.

Talk to your doctor, nurse or dietitian about dealing with any eating problems you may have.

암치료 중 식욕 상실

암치료 중 식욕 상실은 가장 흔한 문제 중 하나입니다. 암 치료 중 건강에 좋은 음식을 먹고 많은 수분을 취하면 기분이 나아집니다.

아래와 같은 방법으로 식욕을 증진하세요:

- 하루에 음식을 약간씩 자주 먹는다.
- 고형 음식이 먹기 싫으면 대신 수분을 섭취한다. 주스, 수프, 밀크 셰이크, “인스턴트 아침 식사”같은 수분이나 파우더 식품 보조품을 먹는다.
- 스낵을 항상 갖고 다니다 먹고 싶을 때 먹는다.
- 공복일 때 수분을 섭취해두어 식사 때 너무 배가 너무 부르지 않도록 한다.

음식 먹는데 문제가 있으면 의사, 간호사, 또는 영양사와 상담하십시오.
