Blood Vessel Disease

Blood vessel disease is also called peripheral vascular disease or artery disease. It is the narrowing of the blood vessels in the abdomen, legs and arms. Blood vessel disease is caused by a build-up of fatty deposits called plaque that narrows blood vessels. When the blood vessels narrow, less oxygen-rich blood gets to your body parts. This can cause tissue and cell death. Blood vessel disease is the leading cause of amputations.

**Signs of Blood Vessel Disease in the Abdomen, Legs and Arms**

- Muscle pain, aches or cramps
- Cool, pale skin, cold hands and feet

- A sore that takes a long time to heal or when scabbed over, looks black
- Loss of hair on legs, feet or toes
- Faint or no pulse in the legs or feet
- Pain with exercise that goes away when you rest

If you have any of the signs, call your doctor to get checked.

腹部、腿部和手臂的血管疾病症状
- 肌肉痛、疼痛或痉挛
- 皮肤苍白发凉，手足冰冷
- 皮肤和手脚指甲呈青红色
- 创伤经久不愈或结疤后发黑

如果有上述任何症状，请致电医生安排检查。
