Emotional Changes
After Giving Birth

After the birth of your baby, you may feel many emotions. You need time to adjust to your body’s changes and to your baby’s needs. These changes can make your emotions swing from happy to sad. This is normal. About half of new moms have these feelings.

You may have one or more of these signs:

- Go from being happy to sad quickly

- Rest or nap when your baby sleeps.
- Take a break and have someone care for your baby while you go out.
