Middle ear infection is called otitis media. This infection occurs when germs get into the middle ear and the area fills with fluid.

Germs from a cold or flu can lead to a middle ear infection. Fluid build-up in the middle ear can put pressure on your eardrum causing pain or other symptoms.

**Signs and Symptoms**
- Ear pain
- Fever
- Drainage from the ear
- Hearing loss
- Loss of balance

**Your Care**
- Your doctor will ask you about your symptoms and check your ears.
- Ear infections often go away on their own.
- Antibiotic medicine may be ordered for severe infections. Take all of your medicine as directed.
- Follow your doctor’s recommendations to treat pain using over-the-counter pain relievers.
- Do not put anything in your ears including liquids, herbs or cotton-tipped applicators unless directed to by your doctor. They can block your ear canal, causing a loss of hearing or infection.

Call your doctor right away if you have:

• Pain that gets worse
• Fever that gets higher or does not go away
• Drainage that gets worse
• Hearing loss

Talk to your doctor or nurse if you have any questions or concerns.

तपाईलाई यीमध्ये कुनै समस्या हुन्छ भने तुरुन्तै डक्टरलाई कल गनुहोसः:

• पीडा झन-झन बढ्दै जानु
• ज्वरो जो बढ्दै जानुहै वा निको हुँदैँ
• स्वर स्थिति झाने नराम्रो हुँदै गइरहेछ
• सुन्न छोड्नु

यदि तपाईंसिंह कुनै प्रश्नहरू वा चिन्ताहरू छन्न भने आफ्नो डक्टर वा नर्सलाई कराकानी गनुहोसः।
