Контроль нагрузки на ногу с помощью ходунков

Weight Bearing Using a Walker

Follow the directions as checked for your injured or weak leg.

Non-weight bearing

For this method, do not let your injured or weak leg touch the floor when standing or walking. When using the walker, hold your injured or weak leg up off the floor.

- Move your walker out in front of you. Be sure all 4 legs of your walker are flat on the floor.
- While pushing down on the walker with your arms, hop on your good foot to the center of the walker.

Touch down weight bearing

Touch the ball of your foot to the floor to help your balance, but do not put your weight on it.

- Move your walker out in front of you about an arm’s length. Be sure all 4 legs of the walker are flat on the floor.
- Move your injured or weak leg forward into the walker, only touching the ball of your foot to the floor.

Talk to your doctor, nurse or physical therapist if you have any questions or concerns.

При этом методе врач скажет вам о допустимой нагрузке на травмированную или ослабленную ногу.

• Поставьте ходунки перед собой на расстоянии вытянутой руки. Убедитесь, что все 4 ножки ходунков стоят на полу.
• Поставьте травмированную или ослабленную ногу в ходунки, перенося на нее допустимую нагрузку.
• Опираясь на ходунки руками, уменьшите нагрузку на травмированную ногу и поставьте здоровую ногу в центр ходунков.

Если у вас есть вопросы или сомнения, обратитесь к своему врачу, медсестре или физиотерапевту.
